

Runar Nyberg
Chief Operating Officer

Runar Nyberg is the Chief Operating Officer of Altera Infrastructure.

Mr. Nyberg joined Altera Infrastructure in 2019, then operating as Teekay Offshore, as Vice President of Operations.

Before joining Altera, Mr. Nyberg held several senior operational and technical leadership positions at Equinor and Statoil, including Vice President of Operations and Offshore Installation Manager. His background spans the upstream oil and gas value chain, including drilling and wells, offshore production, business development, major projects and field development.

With more than 28 years of experience in the upstream oil and gas sector, Mr. Nyberg has built extensive expertise across offshore production, FPSO operations, multi-asset leadership, operational risk management, performance improvement, and major organisational improvement programs. He also represents Altera on the Altera & Ocyan Joint Venture Board.

Mr. Nyberg holds an MBA from Copenhagen Business School, a bachelor's degree in Petroleum Engineering from the University of Stavanger, and a bachelor's degree in Electronic Engineering from Nord University. He has also completed executive education at Harvard Business School.
